## Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Specification***

The disclosure is objected to because of the following informalities:

On page 12, line 17 "rang" should be --range--.

Appropriate correction is required.

### ***Claim Rejections - 35 USC § 112***

Claims 1-13 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter, which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. The claimed subject matter and the specification pertain to a gas turbine operating at a certain pressure ratio, wherein the blades are constructed to achieve that pressure ratio along with other limitations including: a boss ratio, an average degree of reaction range, a range for curvature, and a gauging ratio. The specification lacks an explanation that enables one of ordinary skill in the art to construct a gas turbine, having multiple stages of moving and stationary blades, capable of achieving the ranges of pressure ratio, boss ratio, average degree of reaction, curvature, or gauging ratio as claimed. Since one having ordinary skill in the art would not be able to construct the instant invention based on the provided specification, the instant invention fails to comply with the enablement requirement.
